B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as income when received. Deposits on deposit-type contracts are entered directly as a liability when received. Treaties that do not meet the definition of risk transfer are recorded under the rules of deposit accounting as prescribed in Statement of Statutory Accounting Principles ("SSAP") No. 61 – *Life, Deposit-Type and Accident and Health Reinsurance*. Health premiums are earned ratably over the terms of the related insurance and reinsurance contracts or policies. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments that have original maturities of greater than three months and less than twelve months at date of purchase are carried at amortized cost, which approximates fair value.
- (2) Bonds not backed by other loans are stated at amortized cost or fair value, using the modified scientific method, in accordance with the NAIC Purposes and Procedures Manual of the Capital Markets and Investment Analysis Office. The Company does not hold SVO - designated securities which would be valued using a systematic value measurement method.
- (3) Common stocks are carried at fair value, except for controlled subsidiaries and affiliates which are carried on the equity basis.
- (4) Preferred stocks are stated at cost or amortized cost except those rated NAIC class 4 or lower quality, which are carried at the lower of cost or fair value.
- (5) Mortgage loans are stated at amortized cost or fair value, in accordance with the NAIC Purposes and Procedures Manual of the Capital Markets and Investment Analysis Office.
- (6) Asset backed Securities are stated at amortized cost using the interest method including anticipated prepayments at the date of purchase in accordance with SSAP No. 43-R - *Asset-backed Securities*. Changes in prepayment speeds and estimated cash flows from the original purchase assumptions are evaluated quarterly and are accounted for on the prospective basis.
- (7) The Company carries its insurance subsidiaries as an equity investment in its statutory surplus. In accordance with SSAP No. 97 – *Investments in Subsidiary, Controlled, and Affiliated Entities*, dividends or distributions received from an investee shall be recognized in investment income when declared to the extent that they are not in excess of the undistributed accumulated earnings attributable to the investee. Dividends or distributions declared in excess of the undistributed accumulated earnings attributable to the investee shall reduce the carrying amount of the investment.
- (8) The Company has ownership interests in limited partnerships, joint ventures, or limited liability entities. The Company carries these interests based upon their proportionate share of the underlying GAAP equity of the investment.

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

- (9) Derivative instruments are accounted for at fair value. The changes in the fair market value of the derivative instruments are recorded as unrealized gains or unrealized losses until termination. Swap coupon payments are reflected in net income.
- (10) The Company does not anticipate investment income as a factor in the premium deficiency calculation.
- (11) Claim reserves are established equal to 100% of the estimated benefit payable.
- (12) The Company did not have a change in the capitalization policy or resultant predefined thresholds from the prior year.
- (13) The Company does not have any pharmaceutical rebate receivables.

D. Going Concern

There is no substantial doubt about the Company's ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Accounting Changes

SSAP No. 101

In December 2025, the NAIC adopted revisions to SSAP No. 101 Income Taxes, incorporating certain provisions of ASU 2019-12, Income Taxes, (Topic 740), related to interim-period income tax accounting, including guidance on annual effective tax rate methodologies. The Company continues to compute interim income taxes using actual year-to-date taxable income. The Company believes this methodology approximates the annual effective tax rate approach contemplated under SSAP No. 101 due to the relative stability and predictability of the Company's operations. The Company has evaluated the impact on income taxes due to the adoption of the revised guidance and concluded there was no material impact to the financial statements for the year ended December 31, 2025, or for the period ended June 30, 2026.

Principles Based Bond Definition Project

Effective January 2025, the NAIC Statutory Accounting Principles Working Group adopted reporting changes under the Principles Based Bond Definition project. The reporting changes required review of the Company's bond portfolio to determine whether or not each security meets the new principles-based definition of a bond under SSAP 26. The review of the bond portfolio included evaluation of the economic substance of each security relative to the revised guidance in SSAP 26 Bonds, SSAP 43 Asset-Backed Securities, and SSAP 21 Other Admitted Assets. The impact of these changes is outlined in Note 21 C of this statement.

Net Negative IMR

In August 2023, the NAIC Statutory Accounting Principles Working Group adopted changes that allow companies to admit net negative interest maintenance reserves (IMR) with certain criteria. A company with at least 300% ACL RBC, shall admit net negative IMR as an asset across both general and separate accounts in the amount up to 10% of adjusted capital and surplus of the general account. In addition, an amount equal to the admitted net negative IMR must be included in special surplus from unassigned surplus. A company that admits net negative IMR must include accompanying disclosures. The accounting changes are effective through December 31, 2026 and are nullified as of January 1, 2027.

The Company had \$91,416,468 gross negative IMR, of which \$91,416,468 of net negative IMR was presented as an admitted asset in the general account and had \$3,349,844 gross negative IMR and \$3,349,844 of net negative IMR was presented as an admitted asset in the separate account, as of June 30, 2026.

The adjusted surplus amount used to calculate the 10% limit was \$5,902,423,100 based on reported surplus as of March 31, 2026, adjusted as prescribed for certain balances.

The Company attests that:

- a. Fixed income investments generating IMR losses comply with the reporting entity's investment and liability management policies.
- b. IMR losses for fixed income related derivatives are all in accordance with prudent and documented risk management procedures, in accordance with a reporting entity's derivative use plans and reflect symmetry with historical treatment in which unrealized derivative gains were reversed to IMR and amortized in lieu of being recognized as realized gains upon derivative termination.
- c. Any deviation to (a) was either because of temporary and transitory timing issue or related to a specific event, such as a reinsurance transaction, that mechanically made the cause of IMR losses not reflective of reinvestment activities.
- d. Asset sales that were generating admitted negative IMR were not completed by liquidity pressures (e.g., to fund significant cash outflows including, but not limited to excess withdrawals and collateral calls).

3. Business Combinations and Goodwill - Not Applicable

4. Discontinued Operations - Not Applicable

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

- (1) The maximum and minimum lending rates for mortgage loans during 2026 were 14.15% and 2.25%, respectively.
- (2) Maximum percentage of any one loan to the value of security at the time of the loan, exclusive of guaranteed or purchase money mortgages was 100%.

Notes to the Financial Statements

5. Investments (Continued)

- (3) Taxes, assessments and any amounts advanced and not included in mortgage loan total - Not Applicable

- (2) The Company manages its equity market risk by entering into certain OTC derivatives, primarily equity options and swaps, as well as exchange traded equity options and futures. The Company trades exchange-traded fixed income future contracts, OTC swaps and swaptions to protect against interest rate risk. The Company entered into currency forwards and cross currency swaps to limit its currency exposure from foreign currency denominated assets. Following the qualifying purchases of AFS securities, the fair value of the portion of the bond forward associated with each purchase will be adjusted to the AFS book values, and accretion or amortization will be recognized over the life of the securities using the effective interest method. This arrangement is hedging purchases through December 2036 and is expected to affect earnings until 2056. There was \$290,770,000 of AFS securities purchased through June 30, 2026, and the fair value (\$23,328,414) of the hedge associated with each purchase was adjusted to the AFS security book values.

There were no transfers between Levels 1 and 2 during the current year.

(4) Fair value inputs Level 2 and Level 3

Bonds

In accordance with the NAIC Purposes and Procedures Manual of the NAIC Investment Analysis Office, bonds rated 6 are carried at the lower of amortized cost or fair value. As of June 30, 2026 the Company had six NAIC-6 rated bonds with a carrying value of \$16,744,345. As of December 31, 2025 the Company had three NAIC-6 rated bonds with a carrying value of \$19,607,076.

Separate Account Assets

The estimated fair value of assets held in separate accounts is based on quoted market prices. Separate account assets representing contract holder funds are measured at fair value and reported as a summary total in the Statement of Assets, with an equivalent summary total reported for related liabilities. The market value adjusted annuity is comprised of bonds, in which the fair value is based on external vendor prices. Based on the level of observable activity, these bonds will be measured at either Level 1 or Level 2.

Derivatives

The Company enters into certain OTC derivatives; primarily equity put options and interest rate swaps, and exchange-traded equity and interest rate futures contracts with three-month termination periods. The Company transacts in these derivatives primarily to hedge risk on its life and annuity business. As described in Note 8, the variable annuity business has been 100% ceded via modified coinsurance or funds withheld coinsurance to affiliates since December 31, 2009 and the effect of the derivatives that hedge this business is passed to the reinsurer. The Company transacts in derivatives to manage the interest rate and credit risk related to the general account portfolio. In addition, the Company trades credit derivatives to hedge counterparty risk on reinsurance transactions.

OTC derivatives are valued using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency. Where models are used, the selection of a particular model to value an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability of pricing information in the market. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model inputs can generally be verified and model selection does not involve significant management judgment. Such instruments are typically classified within Level 2 of the fair value hierarchy.

Overall, transfers into and/or out of Level 3 are attributable to a change in the observability of inputs. Assets and liabilities are transferred into Level 3 when a significant input cannot be corroborated with market observable data. This occurs when market activity decreases significantly and underlying inputs cannot be observed, current prices are not available, and/or when there are significant variances in quoted prices, thereby affecting transparency. Assets and liabilities are transferred out of Level 3 when circumstances change such that a significant input can be corroborated with market observable data. This may be due to a significant increase in market activity, a specific event, or one or more significant input(s) becoming observable. Transfers into and/or out of any level are assumed to occur at the beginning of the period.
