West Fraser

Financial Information: The financial information related to West Fraser contained in this Presentation is derived from our Q1 2026 interim Financial Statements (“**Q1 2026 Financial Statements**”), which have been prepared in accordance with International Financial Reporting Standards (“**IFRS**”) and is discussed in our Managements’ Discussion and Analysis (“**MD&A**”) for the three months ended April 3, 2026 (our “**Q1 2026 MD&A**”). Additional Information is also discussed in our MD&A for the year ended December 31, 2025 (our “**2025 Annual MD&A**”) and in our audited Financial Statements for the year ended December 31, 2025 (“**2025 Annual Financial Statements**”). This Presentation uses various Non-GAAP and other specified financial measures, including “Adjusted EBITDA”, “Adjusted EBITDA by segment”, “Adjusted EBITDA margin”, “total debt to total capital”, “net debt to capital”, and “expected capital expenditures”. Additional information relating to the use of these Non-GAAP and other specified financial measures, including required reconciliations, is set out in the section of our Q1 2026 MD&A entitled “Non-GAAP and Other Specified Financial Measures”. Our Q1 2026 MD&A, our 2025 Annual MD&A, our Q1 2026 Financial Statements and our 2025 Annual Financial Statements are available on the Company’s website at www.westfraser.com, on SEDAR+ at www.sedarplus.ca and on the EDGAR section of the SEC website at www.sec.gov/edgar.shtml.

Forward Looking Statements: This Presentation includes statements and information that constitutes “forward-looking information” within the meaning of Canadian securities laws and “forward-looking statements” within the meaning of United States securities laws (collectively, “forward-looking statements”). Forward-looking statements include statements that are forward-looking or predictive in nature and are dependent upon or refer to future events or conditions. We use words such as “expects,” “anticipates,” “plans,” “believes,” “estimates,” “seeks,” “intends,” “targets,” “projects,” “forecasts,” or negative versions thereof and other similar expressions, or future or conditional verbs such as “may,” “will,” “should,” “would,” and “could,” to identify these forward-looking statements. These forward-looking statements generally include statements which reflect management’s expectations regarding the operations, business, financial condition, expected financial results, performance, prospects, opportunities, priorities, targets, goals, ongoing objectives, strategies and outlook of West Fraser and its subsidiaries, as well as the outlook for North American and international economies for the current fiscal year and subsequent periods. Forward-looking statements are included in the following slides in this Presentation:

☐ 2026 Outlook	☐ Summary	☐ Reasons to Invest in West Fraser	☐ West Fraser Lumber Capacity Shifting to Regions with Lower Tariff/Duty Risk, Lower Fiber Costs
☐ U.S. Housing Start Estimates	☐ Lumber and OSB are Not Typically Significant Cost Factors for Home Builders	☐ U.S. Leading Indicator of Remodeling (R&R) Activity	☐ Illustrative Ecosystem of U.S. South Lumber Mill
☐ North American OSB Operating Capacity	☐ Liquidity	☐ West Fraser’s Growth Strategy	☐ Continuous Improvement Through Portfolio Evolution and Optimization
☐ U.S. Lumber Portfolio Optimization has Reduced the Cost Base	☐ Softwood Lumber Duties	☐ West Fraser has Maintained its U.S. Export Market Position	☐ M&A Target Attributes – Seeking “High Quality
☐ 2025 Sustainability Highlights	☐ 2024 Sustainability Report	☐ Broad Offering of Manufactured Wood Building Products	☐ Analyst Commodity Price Forecasts
☐ Modeling EBITDA			

By their nature, these forward-looking statements involve numerous assumptions, inherent risks and uncertainties, both general and specific, which contribute to the possibility that the predictions, forecasts, and other forward-looking statements will not occur. Factors that could cause actual results to differ materially from those contemplated or implied by forward-looking statements include, but are not limited to:

- assumptions in connection with the economic and financial conditions in the U.S., Canada, U.K., Europe and globally and consequential demand for our products, including the ability to meet our shipment guidance, and variability of operating schedules and the impact of the conflicts in Ukraine and the Middle East or elsewhere;
- future increases in interest rates and inflation or continued sustained higher interest rates and rates of inflation could impact housing affordability and repair and remodelling demand, which could reduce demand for our products;
- near and long-term impacts and uncertainties of U.S. administration tariffs and other government policies on the demand and prices of our wood products in the U.S. and the consequential impact on the profitability of our Canadian business, financial condition, results of operations and cash flow and ability to meet our shipment guidance;
- risks associated with international trade and trade restrictions, including impact of tariff actions and possible further actions from the Section 232 investigation such as potential tariffs, export controls, including quotas, or incentives to increase domestic production, future cross border trade rulings, agreements and duty rates, including the renegotiation of CUSMA and/or the failure to renew or replace CUSMA as well as the impact of other government policies;
- global supply chain issues may result in increases to our costs and may contribute to a reduction in near-term demand for our products;
- continued governmental approvals and authorizations to access timber supply, and the impact of forest fires, infestations, environmental protection measures and actions taken and legislation adopted by government respecting Indigenous rights, title and/or reconciliation efforts on these approvals and authorizations, and evolving jurisprudence in Canada on aboriginal rights and title;
- risks inherent in our product concentration and cyclicalities;
- effects of competition for logs, availability of fibre and fibre resources and product pricing pressures, including continued access to log supply and fibre resources at competitive prices and the impact of third-party certification standards, including reliance on fibre off-take agreements and third party consumers of wood chips;
- effects of variations in the price and availability of manufacturing costs, including energy, employee wages, resin and other input costs, and the impact of inflationary pressures on the costs of these manufacturing inputs, including increases in stumpage fees and log costs;
- availability and costs of transportation services, including truck and rail services, and port facilities, and impacts on transportation services of wildfires and severe weather events, and the impact of increased energy prices on the costs of transportation services;
- the recoverability of property, plant and equipment (\$3,551 million), goodwill and intangibles (\$1,713 million), both as at April 3, 2026, is based on numerous key assumptions which are inherently uncertain, including production volume, product pricing, operating costs, terminal multiple, and discount rate. Adverse changes in these assumptions could lead to a change in financial outlook which may result in carrying amounts exceeding their recoverable amounts and as a consequence an impairment, which could have a material non-cash adverse effect on our results of operations;
- transportation constraints, including the impact of labour disruptions, may negatively impact our ability to meet projected shipment volumes;
- the timing of our planned capital investments may be delayed, the ultimate costs of these investments may be increased as a result of inflation, and the projected rates of return may not be achieved;
- various events that could disrupt operations, including natural, man-made or catastrophic events, including drought, wildfires, fires, explosions, mechanical failures, cyber security incidents, any state of emergency and/or evacuation orders issued by governments, and ongoing relations with employees;
- risks inherent to customer dependence;
- implementation of important strategic initiatives and identification, completion and integration of acquisitions;
- impact of changes to, or non-compliance with, environmental or other regulations;
- government restrictions, standards or regulations intended to reduce greenhouse gas emissions and our inability to achieve our SBTi commitment for the reduction of greenhouse gases as planned;
- the costs and timeline to achieve our greenhouse gas emissions objectives may be greater and take longer than anticipated;
- changes in government policy and regulation, including actions taken by the Government of British Columbia pursuant to recent amendments to forestry legislation and initiatives to defer logging of forests deemed “old growth” and the impact of these actions on our timber supply;
- impact of weather and climate change on our operations or the operations or demand of our suppliers and customers;
- ability to implement new or upgraded information technology infrastructure;
- impact of information technology service disruptions or failures or cyber-security breaches or attacks;
- impact of any product, property or general liability claims in excess of insurance coverage;
- risks inherent to a capital intensive industry;
- impact of future outcomes of tax exposures;
- potential future changes in tax laws, including tax rates;
- risks associated with investigations, claims and legal, regulatory and tax proceedings covering matters which if resolved unfavourably may result in a loss to and/or reputational issues for the Company;
- effects of currency exposures and exchange rate fluctuations;
- fair values of our electricity swaps may be volatile and sensitive to fluctuations in forward electricity prices and changes in government policy and regulation;
- future operating costs;
- availability of financing, bank lines, securitization programs and/or other means of liquidity;
- continued access to timber supply in the traditional territories of Indigenous Nations and our ability to work with Indigenous Nations in B.C. to secure continued fibre supply for our lumber mills through various commercial agreements and joint ventures;
- our ability to continue to maintain effective internal control over financial reporting;
- the risks and uncertainties described in this document; and
- other risks detailed from time to time in our annual information forms, annual reports, MD&A, quarterly reports and material change reports filed with and furnished to securities regulators.

In addition, actual outcomes and results of these statements will depend on a number of factors including those matters described under “Risks and Uncertainties” in our 2025 Annual MD&A, as updated in our Q1 2026 MD&A, and may differ materially from those anticipated or projected. This list of important factors affecting forward-looking statements is not exhaustive and reference should be made to the other factors discussed in public filings with securities regulatory authorities. Accordingly, readers should exercise caution in relying upon forward-looking statements and we undertake no obligation to publicly update or revise any forward-looking statements, whether written or oral, to reflect subsequent events or circumstances except as required by applicable securities laws.

A construction worker wearing a white hard hat, safety glasses, and a red long-sleeved shirt is working on a wooden frame structure. He is holding a vertical wooden beam with both hands. The background shows a clear blue sky and the skeletal structure of a building under construction. The text "Q1 2026 Earnings Summary" is overlaid on the right side of the image.

Q1 2026 Earnings Summary

Consolidated Financial Results

US\$ Millions Adjusted EBITDA*	Q1-26	Q4-25
Lumber ¹	\$(84)	\$(57)
EWP - North America	11	(24)
EWP - Europe	10	4
Other	(2)	(1)
Total	\$(66)	\$(79)
Adjusted EBITDA margin**	(5)%	(7)%

- **Q1-26 Adjusted EBITDA includes \$(114)M non-cash adjustment for previous period duties and tariffs**

US\$ Millions (except EPS)	Q1-26	Q4-25
Sales	\$1,334	\$1,165
Costs and expenses	(1,544)	(1,384)
Restructuring and impairment	-	(712)
Operating earnings (loss)	(210)	(931)
Finance income (expense)	(53)	3
Other income (expense)	13	10
Earnings (loss) before tax	\$(250)	\$(918)
Tax recovery (provision)	61	167
Earnings (loss)	\$(188)	\$(751)
Diluted EPS	\$(2.40)	\$(9.63)

¹ Includes \$114 million of duty adjustments related to prior period duty adjustment related to AR7, and changes in estimate of amounts recoverable and payable covering all administrative review periods.

* Adjusted EBITDA and Adjusted EBITDA by segment are non-GAAP financial measures. See the "Non-GAAP and Other Specified Financial Measures" section of our Q1 2026 MD&A for more information on these measures, including reconciliations to the most directly comparable IFRS measures.

** Adjusted EBITDA margin is a non-GAAP ratio calculated as Adjusted EBITDA divided by sales and may not be comparable to similar financial measures disclosed by other issuers. We believe this ratio provides useful information to investors as an indicator of the Company's operating performance. See slide 49 for more information on this measure.

Q1-26 Consolidated Adjusted EBITDA Reconciliation

* Note: Reconciliation items are rounded to the nearest million.

Q1-26 versus Q4-25

US\$ millions unless otherwise indicated	Q1 2026	Q4 2025	Change	Comments
Lumber Shipments (MMfbm)	1,159	1,192	(33)	SYP shipments up 4% on higher operating efficiencies and Henderson ramp-up; SPF shipments down 10% Q/Q due to mill closure and Blue Ridge outage
NA OSB Shipments (MMsf 3/8")	1,544	1,512	32	Higher operating rates in Q1 and ramp-down of High Level, AB mill
EU OSB Shipments (MMsf 3/8")	320	253	67	Higher shipment volumes to meet demand
Adjusted EBITDA	\$(66)	\$(79)	\$13	Favourable lumber pricing and positive inventory revaluation offset by \$114M total duties adjustments
Cash flow from operations	\$(170)	\$(172)	\$2	Mostly seasonal build in working capital
Capital Expenditure	\$94	\$139	\$(45)	Continue to execute on strategic capital
Net Debt (Cash)*	\$457	\$131	\$326	Cash balance declined due to inventory build, capex and dividends offset by improved Adjusted EBITDA; significant financial flexibility maintained.
Net Debt to Capital*	8%	2%	6%	
Cumulative duties on deposit	\$1,035	\$1,003	\$32	Export duty deposits continue to accumulate.

Signs of improved backdrop in Q1; important to maintain financial flexibility in uncertain environment

* Net debt (cash) is calculated as total debt less cash and cash equivalents. Net debt to capital is a capital management measure calculated by dividing net debt by total capital, expressed as a percentage. See the "Non-GAAP and Other Specified Financial Measures" section of our Q1 2026 MD&A for more information on these measures, including reconciliations to the most directly comparable IFRS measures.

2026 Outlook

US\$ unless indicated otherwise		2026F	2025	Commentary
SPF Shipments (MMfbm)		2,400 – 2,700	2,664	100 Mile House (BC) mill closed in late 2025; another modest demand year expected in 2026.
SYP Shipments (MMfbm)		2,400 – 2,700	2,448	Moderate shipment increase with redistribution of production from recently closed mills, portfolio reliability and capital improvement gains, and ramp of Henderson mill.
N.A. OSB Shipments (MMsf 3/8")		5,900 – 6,300	6,345	High Level (AB) mill indefinitely curtailed as of end of April; expecting somewhat softer OSB demand in 2026.
Europe OSB Shipments (MMsf 3/8")		1,000 – 1,250	1,129	Expecting similar to slightly improved demand in 2026.
Capital Expenditures* (MM)		\$300 – \$350	\$411	Focus on operationalizing recent major capital projects.
Costs	Fibre	↔	↔	Near-term Canada stumpage expected to be relatively stable Q/Q while U.S. South log costs are expected to decline modestly in 2026, with costs varying by region. Labour constraints expected to continue to improve Expecting costs for chemicals, fuels, resins and waxes to rise relative to 2025 due to impact of Middle East conflict;
	Transportation	↔	↔	
	Labour	→	→	
	Resin	↔	↔	

No Changes to 2026 Shipments and Capital Expenditures Guidance

* Expected capital expenditures is a supplemental financial measure that represents our best estimate of the amount of cash outflows relating to additions to capital assets for the year based on our current outlook. See the "Non-GAAP and Other Specified Financial Measures" section of our Q1 2026 MD&A for more information on this measure.

Summary

Q1 2026 Recap

- Higher lumber prices, especially in SYP, led to better quarter for lumber
- SYP shipments up 4% from Q4 on improved operating efficiency despite closure of Augusta sawmill in Q4; fire at Blue Ridge sawmill impacted SPF volumes
- Successful ramp-down of High Level OSB mill, curtailed as of the end of April '26
- Declared and paid \$0.32 per share quarterly dividend
- Strong liquidity position of almost \$900 million

Looking Forward

- Q1 saw improvement in lumber prices; longer-term demand fundamentals are favourable
- Ongoing focus on operational excellence and operationalizing the benefits of strategic capital to drive down costs
- Higher transportation and resin costs resulting from Middle East conflict could impact end user demand
- Ramp-up of modernized Henderson sawmill

Continue transformation into leading global wood products company in face of market headwinds

A construction worker wearing a white hard hat, an orange safety vest over a grey shirt, and black gloves is using a power tool to work on a wooden structure. The background shows a construction site with wooden framing and debris. The text "Why Investors Should Own West Fraser Shares" is overlaid on the right side of the image.

Why Investors Should Own West Fraser Shares

Reasons to Invest in West Fraser

One of the world's largest producers of sustainable wood-based building products

Offers **financial resilience** through a portfolio that is **product and geographically diverse**

Serves markets with **attractive longer-term fundamentals**

Has a track record of **disciplined and balanced capital allocation**

Has the **scope, scale, and expertise** to unlock further growth

Is positioned to benefit from **strong sustainability fundamentals**

Has an **attractive record of creating shareholder value**

Resilience from Product and Geographic Diversity

Product & Geographic Diversification – Capacity

West Fraser Lumber Capacity Shifting to Regions with Lower Duty/Tariff Risk, Lower Fiber Costs

- US South growth to ~54% of capacity (from ~11% in 2004); lower-cost region, not subject to duty risk
- Exposure to higher-cost B.C. fiber reduced to ~18% of capacity (from ~77% in 2004)

Historic Adjusted EBITDA

Proforma Historical Combined Adj EBITDA (US\$ millions)

Segment Adj EBITDA Mix (US\$ millions, excl. Corporate)⁽¹⁾

Source: U.S. Census Bureau, West Fraser, Norbord filings.

Prices began recovering in Q1-26, leading to a sequential improvement in results

Note: Excludes the proforma effect for the acquisition by West Fraser of 11 sawmills between 2010 and 2017.

Fundamentals**

U.S. Housing Start Estimates (Thousands)

Source: U.S. Census Bureau, industry analysts.

Industry analysts do not expect U.S. housing starts to show marked improvement until 2027

Lumber and OSB are Not Typically Significant Cost Factors for Home Builders

*Lumber and OSB products generally comprise 15-20% of the total labour and materials costs to frame a SF house; combined, lumber and OSB costs are typically ~3% of total construction costs and ~2% of new home selling prices***

Mix of Total Construction* Costs for SF Home (2013-2024)

Lumber & OSB Materials – Minor Proportion of Framing Costs

Source: NAHB Construction Cost surveys, West Fraser analysis.

Lumber & OSB are modest contributors to new home construction costs and historically have experienced demand inelasticity in the new home building segment

* Construction costs include all labour and materials costs

** Used average of 2019 & 2024 house price and costing data to exclude COVID-related supply chain and pricing dynamics; assumes 15,000 fbm of lumber and 10,000 sf (3/8") of OSB consumed per 2,400-2,600 sf SF house, \$500/MBFM lumber and \$300/MSF (7/16") OSB prices.

U.S. Leading Indicator of Remodeling (R&R) Activity

Source: Joint Center for Housing Studies of Harvard University, January 2026. West Fraser analysis.

Housing repair and remodeling dollar spend has largely trended sideways in the years after the COVID pandemic, but industry pundits forecast a modest spending recovery in 2026

Illustrative Ecosystem of U.S. South Lumber Mill

By building a new sawmill adjacent to an existing mill we are able to utilize existing infrastructure and skilled labour, enabling a faster ramp-up while reducing financial, operational and execution risks

Approximate resources for 250 MMfbm U.S. south mill:

- 130-140 employees
- 1MM tons of logs
- 40k logging truck loads
- 400-500k tons of residuals
- 16-20k residual truck loads
- 25-30k finished goods truck loads

Serving a Broad Distribution Network and Customer Base

West Fraser serves thousands of delivery points and customers across North America; the majority of product shipments use rail to transport Canadian SPF and OSB to U.S. markets and trucks to transport SYP and OSB from mills in the U.S. south.

West Fraser Logistics (shipments, approximate)

- Canadian mill origination
 - 70/30 rail/truck split
 - Typical delivery to U.S. is 2-4 weeks, 2,000+ kilometers
- U.S. mill origination
 - 15/85 rail/truck split
 - Typical delivery is 2-3 days, < 400 miles
- Annual rail cars: 40-50k+
- Annual trucks: 200-300k+

NA Revenue Mix – Top 25 Customers (2025)

Illustrative Transportation Routes

North American Lumber Supply at 10-year Lows

Since the pandemic highs of production / demand, 2025 marks the 4th consecutive year of contraction in North American production.

Reduction in Canadian production of ~15 Bfbm (nearly 700k starts equivalent) due to lack of available logs, mill closures and other constraints, offsetting growth in U.S. South supply

CAGRs	Lumber Supply					Demand	
	B.C. Canada	Other Canada	U.S. South	Other U.S.	All N.A.	U.S. Starts	R & R Spend
5-yr	-7.5%	-1.3%	1.3%	-2.4%	-1.1%	-0.3%	2.7%
Since 2005	-5.7%	-1.4%	0.9%	-2.2%	-1.6%	-2.3%	1.4%

Source: FEA, West Fraser analysis.

In recent years, ~1/3rd of N.A. lumber has been supplied by Canada; typically, the large majority (circa 70%) of that Canadian production is exported

North American OSB Capacity

North America OSB Capacity and U.S. Housing Starts

- West Fraser indefinitely curtailed its High Level, Alberta OSB mill in April 2026
- One greenfield OSB mill expansion was started-up by a competitor in H2-24; the new mill has an estimated annual capacity of 600MMSF (3/8" basis)
- West Fraser acquired the idled Allendale, South Carolina mill in late 2021 and began the re-start phase of the mill in Q2-23 (estimated annual capacity of 700MMSF (3/8" basis)
- West Fraser re-started its OSB mill in Chambord, Quebec in March 2021
- One OSB mill was permanently closed in 2020 while a press fire at another competitor mill in spring 2022 kept that mill out of commission into H1-24

Source: FEA.

Capacity has climbed incrementally since 2023; West Fraser is focusing production on its most efficient OSB Mills

Disciplined and Balanced Allocator of Capital

Capital Allocation Priorities

- Replace end-of-life assets
- Maintain low-cost position
- Strategically enhance product mix, productivity and capacity

- Maintain investment-grade rating
- Maintain liquidity buffer to aid the pursuit of opportunistic M&A and larger-scale strategic growth initiatives

- Repurchase shares when they trade at a discount to estimated intrinsic value
- Pay a stable, sustainable dividend

Capital Allocation Lookback

- Multi-year history of cash flow generation is strong
- Significant investments in maintaining, expanding and improving the business at ~46% of cash generated
- Excess capital returned to shareholders of ~52% of cash flow, heavily weighted to buybacks, influenced by two SIBs

2016 Through Q1-2026 (includes 2021 & 2022 SIBs)

Balanced Capital Allocation

* Net of divestitures of US\$124MM in H1-24

** Net of shares issuance

Share Repurchases

Cumulative Investment in Repurchases* (US\$ millions)

Total Volume Traded ('000s, All Canadian and U.S. Exchanges)

Source: FactSet.

Average repurchase price (CAD\$):

2013	\$44.60
2014	\$51.86
2015	\$55.57
2016	\$44.06
2017	\$68.45
2018	\$83.13
2019	\$68.30
2020	N/A
2021	\$95.29
2022	\$112.98
2023	\$95.99
2024	\$110.72
2025	\$106.45
2026	N/A

Trading activity has increased meaningfully after recent subdued activity during cyclic slowdown

* Cumulative investment in repurchases is calculated as the sum of all historical cash outflows for share repurchases.

Lookback on West Fraser's Capital Reinvested

Source: FactSet, West Fraser analysis.

17% average ROCE through the cycle

* ROCE defined as EBIT / Average ((Total Assets less Cash) – (Current Liabilities less Current Portion of LT Debt))

Note: 2021 ROCE is a proforma estimation that includes Norbord operating earnings and capital employed for Jan 1, 2021 through Jan 31, 2021; excluding this January 2021 stub period, West Fraser's 2021 ROCE would be 73%

Liquidity (\$millions)

Available Liquidity*

Scheduled Maturities

Total Debt to Total Capital

West Fraser Timber is considered investment grade by two leading rating agencies.

Agency	Rating	Outlook
Moody's	Baa2	Negative
Standard & Poor's	BBB-	Stable

Note: Ratings are as at May 20, 2026.

Strong liquidity continues to support financial flexibility

* Available liquidity is a capital management measure calculated as the sum of cash and short-term investments and funds available under committed and uncommitted bank credit facilities.

Note: Cash consists of cash and short-term investments less cheques issued in excess of funds on deposit. "Total Debt to Total Capital" is a capital management measure calculated by dividing total debt by total capital, expressed as a percentage. See the "Non-GAAP and Other Specified Financial Measures" section of our Q1 2026 MD&A for more information on these measures, including reconciliations to the most directly comparable IFRS measures.

Scope, Scale and Expertise to Unlock Growth

West Fraser's Growth Strategy

- Our **objective** is to be the premier wood building products company in North America, resulting in long-term value creation.
- Our **strategy** to achieve this objective is to develop and maintain a highly disciplined organization relentlessly focused on **continuous improvement** in safety and productivity across all our operations.
- We will **continually invest in our people and our business** to achieve best-in-class productivity and returns that enable continued growth.

WEST FRASER'S VALUES & BELIEFS

West Fraser makes renewable wood products for the world

Our business strategy is simple:

- Low cost
- Reinvest profits
- Prudent balance sheet

Our goals are to develop and maintain:

- **Excellence** in performance and people
- **Leadership** in our field
- **Challenge** & satisfaction
- **Responsibility** in communities in which we work
- **Profitability**
- **Growth**

Continuous Improvement Through Portfolio Evolution and Optimization

Actively seeking mill portfolio optimization through acquisitions, divestitures, curtailments/closures* and strategic capital

West Fraser – Corporate Development Timeline (late 2021 thru Q1 2026)

* Approximately 1.12 billion fbm of lumber capacity has been removed since 2022 through a combination of permanent shift reductions and mill closures. A West Fraser mill that is indefinitely curtailed has its operations wound down and is typically off-line for a multi-year period.

U.S. Lumber Portfolio Optimization Has Reduced the Cost Base

Site count down 5, capacity largely preserved

Source: West Fraser's 2021 and 2025 Annual Information Form.

Actions taken to optimize the sawmill portfolio

- Closed 5 sawmills in the U.S. South where long-term economics were less attractive, including those related to log access, market access, and residual outlets
- Replaced 2 sawmills via brownfield modernization at Dudley Georgia, and Henderson, Texas to improve mill efficiency and strengthen position in attractive operating regions
- Added 1 sawmill in late 2021 through M&A at Angelina, Texas

Source: Public filings, West Fraser analysis.

Continuous improvement delivering lower unit costs

Note: Costs measured in nominal dollars per unit of production. Includes ramp up of New Henderson Facility.

Removed high-cost mills while preserving output

- Removing higher-cost mills reduced the fixed cost base while preserving our output capacity
- Production shifted to lower-cost mills, improving utilization and lowering unit costs
- Targeted strategic capex continues to improve capacity, reliability, and cost performance

Risk Mitigators for West Fraser

- To help mitigate duty payments, West Fraser has optimized its Canadian lumber portfolio (modern, low-cost mills), continues to invest in high-quality U.S. lumber assets (e.g., Angelina, Henderson) and generates a majority of U.S. destination lumber sales from U.S. origins.

Source: Government of Canada (Global Affairs website), public filings, West Fraser analysis.

West Fraser has comparatively low AR6 duty rates vs. the Canadian industry; an asset optimization and U.S. growth strategy help to mitigate duty risks

* West Fraser and Canfor are the two mandatory respondents for AR6; "All Others" represent the Canadian lumber exporters other than mandatory and voluntary respondents, whose countervailing and anti-dumping duty rates are determined separately using weighted average calculations of the rates for the respondents.

** Starting in AR7, Resolute FP Canada Inc. is an additional mandatory respondent. In AR7, Canfor is not a mandatory respondent for CVD, only for ADD.

West Fraser has maintained its U.S. export market position

Weaker economics have reduced Canadian lumber exports to the U.S.; West Fraser has better preserved shipments and strengthened its relative position

Estimated Canada-U.S. Softwood Lumber Exports

- Since 2021, weaker U.S. demand, higher duties and tariffs, and a reduced annual harvest in B.C. have accelerated capacity reductions and lowered Canada-U.S. softwood lumber exports
- The decline is roughly equivalent to the lumber required for 130k housing starts
- Against this backdrop, West Fraser has grown its share of Canadian softwood lumber shipments to the U.S.
- West Fraser benefits from a lower combined duty and tariff burden than its Canadian lumber peers
- With challenges to restarting curtailed capacity, West Fraser is better positioned to serve both Canadian and U.S. customers

Source: Global Affairs Canada, West Fraser public disclosures, West Fraser analysis.

A low-cost, integrated Canadian platform has allowed West Fraser to weather the downturn and compete effectively through a period of significant industry contraction

Note: The AR rates are for the period of review, which do not directly correspond to fiscal calendar years.

M&A Target Attributes – Seeking “High Quality”

As West Fraser develops its M&A pipeline and pursues opportunities, a primary focus is on identifying “high quality” assets/businesses that will lower costs or enhance margins, ideally while also moderating West Fraser’s overall EBITDA variability through the cycle

• We consider a number of factors when pursuing M&A; examples of “high quality” attributes include:

- ✓ Close proximity to sustainable, accessible, stable-priced fiber baskets to supply the mill
- ✓ Synergies with existing mill network e.g. log procurement savings
- ✓ Attractive or modern manufacturing facilities i.e. good “steel in the ground”
- ✓ An efficient, reliable work force with supporting community facilities
- ✓ Nearby access to a robust logistics and transportation network, including available truck/rail capacity
- ✓ Close proximity to a large customer base
- ✓ A reliable outlet for sawmill residuals (for the Lumber segment)

Case Study – Angelina Forest Products, Lufkin, Texas (acquired December 2021)

Attribute	“High Quality” Factors at Time of Acquisition
Proximity to Fiber	Near abundant east Texas fiber baskets
Synergies	Shared log procurement with WF’s Nacogdoches OSB mill
Manufacturing Assets	Modern greenfield mill ~18 months into start-up curve
Work Force	Highly skilled, trained for modernized mill; near Lufkin, TX
Logistics/Transportation	Efficient site logistics with supportive local infrastructure
Proximity to Customers	Near three large and growing Texas population centres
Outlet for Residuals	Multiple buyers in the region

Positioned to Benefit from Strong Sustainability Fundamentals

2025 Sustainability Highlights

ENVIRONMENT

Capital investment in our McDavid Florida mill strengthens the connection between sustainability and operational excellence.

SOCIAL

Signed a long-term fibre supply and forest management agreement with the Lake Babine Nation in Northwest B.C.

GOVERNANCE

Embedding sustainability throughout our operations including managing energy use and reducing carbon, guided by their site specific, energy reduction roadmaps.

2024 Sustainability Report

Our report measures sustainability performance across a variety of **environmental**, **social** and **governance** goals and disclosed targets.

** S&P Global Timber & Forestry Index (basket of more than two dozen of the largest publicly-traded companies engaged in ownership, management or the supply chain of forests and timberlands, including makers of forest products, paper and paper packaging).

The background image shows a multi-story building under construction. The walls are covered in light-colored wooden sheathing. Several rectangular window and door openings are visible. The roof structure, including wooden rafters and beams, is exposed. The sky is a clear, vibrant blue with a few wispy white clouds. In the foreground, there is a dirt area and some construction materials. Overlaid on the left side of the image is a large, semi-transparent blue geometric shape composed of several overlapping triangles and polygons.

Appendix

Broad Offering of Manufactured Wood Building Products

SPF

Spruce Pine Fir (SPF) is a species that includes Engelmann spruce, white spruce, hybrid white spruce, lodgepole pine and subalpine fir. This lumber is lightweight, easily worked, takes paint well, holds nails well and exhibits small knots.

SYP

Southern Yellow Pine (SYP), known for its strength and durability, grows in the southern United States from Virginia to Florida and west to Texas. SYP lumber is a versatile product used in a variety of applications.

OSB

Oriented Strand Board (OSB) is a versatile structural wood panel. Used in roofs, walls and floor applications, OSB makes use of wood that may not otherwise have commercial value, which helps to maximize forest utilization.

Plywood

Plywood is made from multiple layers, or ply, of softwood veneer glued together with the grain of each layer perpendicular to adjacent layers. Plywood panels have superior dimensional stability, two-way strength and stiffness properties and an excellent strength-to-weight ratio.

LVL

Laminated Veneer Lumber (LVL) is manufactured primarily for structural framing in residential and commercial construction. LVL is made from rotary-peeled veneers bonded together under heat and pressure into large panels that are cut into a range of widths.

MDF

Medium-Density Fibreboard (MDF) is an engineered non-structural wood panel made from 100% western white softwoods that have a consistent light sandy colour. The purity and long fibre allow the finishing to fit a variety of interior applications.

Particleboard

Particleboard is a non-structural, engineered wood panel produced by pressing recycled wood fibre to create a product with a consistent, pristine surface that caters to many everyday applications, such as furniture or cabinets.

HiLine® Treated

HiLine® Treated is wood pressure treated with a preservative that uses innovative micronized pigment technology to achieve a warm, natural brown tone. Our advanced treatment process, combined with a high quality, consistent substrate, delivers exceptional value for a variety of outdoor building applications.

West Fraser North America Lumber and EWP Adjusted EBITDA Margin¹

Note: Lumber adjusted EBITDA is after duties; North America EWP includes Norbord historic North American OSB results.

* 2021 cost of products sold for EWP was increased and Adjusted EBITDA decreased by an \$86 million one-time charge related to inventory purchase price accounting, lowering 2021 adjusted EBITDA margin ~190 bps

Similar, yet different, supply/demand factors for Lumber and OSB markets reflected in margin cycles

¹ Adjusted EBITDA margin is calculated as Adjusted EBITDA divided by sales. See the "Non-GAAP and Other Specified Financial Measures" section of our MD&A for more information on Adjusted EBITDA, including a reconciliation to the most directly comparable IFRS measure. We believe that disclosing this measure assists readers in measuring performance relative to other entities that operate in similar industries and understanding the ongoing cash generating potential of our business. EBITDA margin and Adjusted EBITDA are not standardized financial measures under IFRS and may not be comparable to similar financial measures disclosed by other issuers.

Modeling EBITDA

Estimated Earnings Sensitivity to Key Variables

(Based on 2025 annual shipment volumes - \$ millions)

Factor	Variation	Change in pre-tax earnings ¹
Lumber price	\$10 (per Mfbm)	51
NA OSB price	\$10 (per Msf)	54
Europe OSB price	£10 (per Msf)	15
U.S. / CAD \$ exchange rate ²	\$0.01 (per \$ CAD)	19

Notes:

1. Each sensitivity has been calculated on the basis that all other variables remain constant and is based on changes in our realized sales prices.
2. Represents the USD impact of the initial \$0.01 change on CAD revenues and expenses. Additional changes are substantially, but not exactly, linear.
